

# Libertarian Socialism: Politics in Black and Red

*'Libertarian Socialism: Politics in Red and Black is an invaluable contribution to historical scholarship and libertarian politics. The collection of essays contained in the book has the great virtue of offering both analytical perspectives on ideas, and historical perspectives on movements. The contributions examine classical themes in anarchist politics such as individual liberty, whilst also exploring more neglected thinkers and themes from a libertarian standpoint, such as C. L. R. James and race. There can be little doubt that the volume will be of major interest to historians, theorists, students and activists.'*  
— **Darrow Schecter**, *Reader in Italian, School of History, Art History and Philosophy, University of Sussex, UK*

*'Just what we need as we move into a new phase of revolt against the obscenity of capitalism: a recovery of the richness of our different traditions of struggle, with their weavings and bumpings. Time to move on, time to redeem the struggles of the past. A valuable and welcome collection.'*  
— **John Holloway**, *author of Change the World Without Taking Power and Professor of Sociology, Autonomous University of Puebla, Mexico*

*'This is a welcome and essential collection that is sure to spark debates and support ongoing efforts to build a liberatory movement in which Marxists and anarchists can find common ground and practise mutual respect and humility. In this period of late capitalism, survival itself is at stake. Theory and practice, whether Marxism or anarchism in their many manifestations, lead to dead ends without careful assessment of the world as it is now.'*  
— **Roxanne Dunbar Ortiz** *is a teacher, historian and writer, as well as a veteran of worker, feminist and indigenous movements*

*The history of the left is usually told as one of factionalism and division. This collection of essays casts new light on this history, showing in more detail how the boundaries between Marxism and anarchism have been more porous and more productive than is conventionally recognised. Bringing together original and groundbreaking pieces on some of the best and least known actors in twentieth-century socialism, this book promises to break new ground by providing a fresh outlook on left-wing synthesis in the twenty-first century. The political and social thought of Gramsci, Sorel, and the Trinidadian, C. L. R. James, amongst others, are discussed alongside key movements in twentieth-century socialism, including the Situationist International, Socialisme ou Barbarie and lesser-known Council Communists, carnival anarchists and anarchic currents in the American civil rights movement. This is a must-read for students and scholars interested in the development of socialist ideologies.*

**Alex Prichard** is Lecturer in International Relations in the Department of Politics at the University of Exeter, UK.

**Ruth Kinna** is Professor of Political Theory in the Department of Politics, History and International Relations at Loughborough University, UK.

**Saku Pinta** is an Independent Scholar.

**David Berry** is Senior Lecturer in History in the Department of Politics, History and International Relations at Loughborough University, UK.
