

### Greetings from the Chairman

Dear Alumni,

Remember the cloudy winters in Ghent! There was not only the hardship of the exams and the courses, but moreover the total absence of the sunshine, so necessary for you. However, the proverb says: 'Every cloud has a silver lining'. So, we are looking forward to the spring which is in the air. By Eastern, life is becoming much more pleasant.

At the CES, things are, as always, very hectic. We have a very good 'crop' of students and everyone is performing at top speed. We are currently in the process of reorganising all courses at the university in a bachelor / master configuration. The M. Sc. in Environmental Sanitation will remain as a 2 year Master programme.

In the mean time and much to our surprise, we got involved in the struggle for the ranking of universities worldwide. Indeed, every institution competes to be taken up in listings regarding its quality. In that respect, we have good news for you. The Ghent University was recently mentioned twice in such rankings. As a result of an evaluation by the Shanghai Jiao Tong University, the Ghent University was named in the Top 100 of all universities worldwide, which is quite nice. Moreover, an inquiry among doctoral students worldwide published in 'The Scientist' put our Alma in the Top 10 for non American doctoral studies!!!

The CES took some initiatives which may be of special interest to you:

1. On March 24, we are organising a meeting of the CES foreign students and TNAV. The latter is an organisation which represents a whole array of Flemish industrialists who export their technology in relation to the environment to other countries. TNAV has

understood that the very best ambassadors they might have in foreign countries are the CES alumni. Indeed, you as no other know our way of doing and handling things and you can represent our industrialists in a straightforward way to people in your country. If some of you might have ideas, proposals, links, etc.; please do not hesitate to contact us and we will convey your messages to the TNAV.  
[www.tnav.be](http://www.tnav.be)

2. We are organising a Refresher course 'Up to date water treatment and reuse' in the summer of 2004 (announcement: see Newsletter 1, programme content: see [www.cms.UGent.be/alumni.htm](http://www.cms.UGent.be/alumni.htm)).

3. We are strongly involved in the organisation of the ESEB 2004 at Oostende. For all of you dealing with environmental biotechnology, this might be 3 days to consider because they certainly will enable you to make interesting contacts with basic scientists and with the industry implementing technology in practice. For more information visit: [www.eseb2004.be](http://www.eseb2004.be)

We certainly look forward to hear from you all. Have a nice springtime and may the memories of Ghent be warm and encourage your many endeavours.

Yours sincerely,  
Prof. Dr. ir. W. Verstraete  
Chairman CES
